

# AML COMPLIANCE

Anti-Money Laundering is a global regulatory focus.

Never has it been more important for firms to prove they are fully AML compliant in all jurisdictions they operate.

## Governance

Firms must have an effective AML Governance framework to ensure their firm can evidence full AML compliance.

## Risk Evaluation

Firms must identify the AML regulations that apply in each jurisdiction before a Risk Assessment is undertaken and resourcing determined.

## Policies/Procedures

All the Policies/Procedures required to ensure the whole firm is AML Complaint must be drafted and implemented.

## Ad-Hoc Reports

Exceptional issues have to be identified and promptly escalated to management.

## Monitoring/Reporting

Periodically there must be testing and reporting on the success (or otherwise) of the AML Policies/Procedures.

## KEY FEATURES

**Rule Checking: Regulatory/Internal**  
Run rules on question answers to flag potential breaches/internal controls.

**Process Management**  
Use dynamic questions/responses to ensure processes are followed.

**Incident/Breach Management**  
Assess potential breaches and manage them to resolution.

**Reports/Business Intelligence**  
Maintain compliance records and produce on-line/Excel/PDF reports.

## FLEXIBLE & LOW COST

### Flexible

GRC-Maestro uses Templates so each firm can run their AML Compliance checks to suit their requirements:

- **Standard** - Use pre-built Templates covering laws, regulations and industry best practice
- **Copy & Edit** – Use existing Templates and edit for your own requirements
- **Customise** – Build new Templates based on your own requirements

### Low Cost

GRC-Maestro has a range of price plans to give users great compliance software at a low cost.

There are no hardware requirements or software to install, just log in through any browser.
